

06-59 12m Fishing Vessel

The design is a hard chine monohedron form with a soft fine entry fairing to a fairly low 12 degree deadrise. A built in strake at the chine provides lift and deflects spray. A knuckle in the topside increases flare and deflects any "green" water and spray in heavy going. A "planing plank" flat at the keel ensures great acceleration and very shallow running draft. The hull has excellent performance, a soft ride and is very dry.

The vessel is designed to USL Code 3C - Seagoing Fishing Vessel for use in all operational areas up to and including Restricted Offshore Operations.

PARTICULARS

Length Overall:	13.27 m
L(hull):	12.2m
LWL:	10.9m
Beam (MLD) :	4.2m
Design Draft:	.42m (Lightship)
Fuel:	1200L
Propulsion:	CAT C12 (705bhp@2300rpm) driving a Hamilton HJ364 w/jet through a ZF325 g/box
Survey:	USL 3C (or equivalent class)
