08-70B 12m High Speed Assault/Patrol Boat

The design is a "deep vee" surface piercing monohedron of the proven "Delta" type with a long soft entry fairing to a 20 degree deadrise body. A built in strake at the chine provides lift and deflects spray. The low resistance and sure handling characteristics of these hulls ideally suit the boat's duty. Explosion resistant fuel tanks and composite ballistic panels in the wheelhouse further add to a competent patrol vessel.

Length Overall (HULL):	11.9 m
LWL:	10.25 m
Beam (Max):	3.3 m
Beam (Moulded):	3.1 m
Design Draft:	0.5 m
Fuel Capacity:	900 litres
Performance:	47kts @ Full Load.
Propulsion:	Twin CAT C9 ACERT (503 bhp@2500 rpm) driving Hamilton HJ292 waterjets through ZF305-2 g/boxes.
Survey/Class:	Lloyds SSC
