06-55 9.6m Dive Support Vessel

The design is a hard chine monohedron form with a deep fine entry fairing to a moderate 15 degree deadrise. A built in strake at the chine provides lift and deflects spray. A knuckle in the topside increases flare and deflects any "green" water and spray in heavy going. The hull has good performance, a soft ride and is very dry. The boat is a rugged simple work boat with good performance and a huge open work deck for its size.

The vessel is designed to USL Code 2C - 2 crew and 2 special personnel.

PARTICULARS

Length Overall:	9.6 m
LWL:	7.93 m
Beam (MLD):	3.4m
Design Draft:	0.42m
Passengers:	4 Special Personnel
Fuel:	500L
Propulsion:	Yanmar 6LY-STE/ZF220/HJ 292
