

## 08-72 10m HDPE Work Boat

The design is a moderate surface piercing monohedron with a soft entry fairing to a 12 degree deadrise body. The hard chine provides lift and deflects spray. This combination of features allows a compromise between good performance and handling, a soft ride and a “dry” boat with good seakeeping.

The hull is fabricated from welded high density polyethylene (HDPE).

Length Overall:	10.2 m
LWL:	8.95m
Beam:	3.25m
Design Draft (Hull):	0.41 m (Lightship)
Fuel:	550L
Propulsion:	YANMAR 6LYA-STP (370bhp@3300rpm) driving HJ322 w/jet through ZF280-1 g/box
Survey:	USL 2C(2+6)
